Industrial PC Platform
Openness meets Automation Control

Powerful performance – maximize output
Rock-solid build – improve uptime
Real-time OS inside – reliable machine control
Industrial PC

Powerful, reliable, scalable - and tough as they come
Our NY Industrial PC has been designed from first principles to be powerful, reliable and scalable, making it ideally suited to visualization, data handling, measuring and controlling. We've simplified the design and build to eliminate faults caused by complexity and, with other unique design features, to maximize uptime and reduce costs. The future will be IT driven: Omron’s IPC platform will make you part of it.

Simplicity improves reliability
Unnecessary complexity causes problems, so we’ve eliminated it totally, to improve reliability, maximize performance.
- No internal cables
- No complex heatpipes
- Structurally uniform mechanics to enable future expansion
- Reduced assembly, maintenance and labor costs
- Rock-solid architecture. Die-cast aluminum case

Performance
- Based on Intel® Atom® to Intel® Xeon® processors
- Up to 32 GB ECC(DDR4 SDRAM) supported
- Intel® Iris™ Pro Graphics or Intel® HD Graphics
- Unique heatsink effectiveness
- RoHS Directive (2002/95/EC), EU Directives, KC Registration, RCM, cULus, EAC

Industrial Panel PC: very stylish…

Our industrial-quality touchscreen panel PCs and monitors enable operator and maintenance engineer to interact more effectively with the machine. The touchscreen controller can detect non-standard actions such as false touches, palm rejection, water and cleaning - even if the user is wearing gloves.*1

A few details…

- 12.1, 15.4 & 18.5 Inch industrial display
- Multi-touch, using the latest projected capacitive technology
- False touch detection
- Glove operation*1
- Easy built-in supportive mounting
- Unique customized logo

---

*1. When using gloves, ensure to use gloves that are functional with this touchscreen.

*2. Industrial Monitor won the IF Design Award 2016. The IF Product design Award, presented by Hannover-based International Forum Design GmbH, is one of the world’s most prestigious design awards.

*3. An optional CFast Card slot is located at the rear side of the base layer.
Perfect fusion: Sysmac machine control and IT technology

Designed specifically for machine usage, making them innovative yet reliable, the IPC Machine Controller combines the precision and utility of the Sysmac platform with the versatility and range of Windows programs. The two platforms operate simultaneously but separately, so if Windows is down, the machine just keeps on working. As a result, engineers become unstoppable - empowered to explore manufacturing innovation by leveraging big data, NUI (Natural User Interface) and IoT (Internet of Things) initiatives, all without compromising proven PLC reliability and robustness.

Industrial PC

- Fourth-generation Intel® Core™ i7;
  - Four core/8 threads
- Windows Embedded Standard 7
- Open operating system enables use of own software
- Ethernet port for access to your IT systems

Machine Controller

- Sysmac Machine control inside
- 500 μs system cycle time
- 16 to 64 axes of motion control
- EtherNet/IP port for machine-to-machine, HMI communication
- EtherCAT port for up to 192 synchronized slaves
- Safety over EtherCAT - FSoE

Sysmac Studio

Integrated Development Environment

- A single tool for logic sequence, motion, safety, robotics, vision, HMI and Database connection
- Open standard IEC 61131-3
- Sysmac Library to optimize engineering time and machine availability

The beating heart of the IPC Machine Controller

Our challenge was to use Sysmac machine control in combination with an open operating system like Windows. Normally it would be done using full virtualization, but this would influence the machine control, so it wasn’t acceptable to us. Instead, we use partitioning, so that both operating systems can work independently: if Windows is down, the machine is not affected.

*1. Industrial Box PC was awarded the Red Dot Award 2016 in the category ‘computers’. The Red Dot design award has been presented by the Design Zentrum Nordrhein Westfalen since 1955. It is one of the best- respected design competitions in the world, along with the iF award (Germany) and IDEA (the United States).
*2. Industrial Box PC was awarded the Good Design Award 2017. The Good Design Award has been a sole comprehensive design evaluation and commendation system in Japan since 1957. Many companies and designers from both inside and outside of Japan participate in this activity to enhance their industry or quality of life through design.
Continuous operation: productivity, efficiency, safety

- Vertical integration delivers production data from manufacturing process directly to IT systems
- Data management enables machine data to be recorded, stored and analyzed to improve productivity
- EtherCAT connectivity simplifies installation of production modules and safety devices
Industrial PC
IPC RTOS Controller
Available in Japan only. Please consult your OMRON representative for details.

Real-time operating systems: freedom at your fingertips
The Omron IPC RTOS Controller enables you to program own real-time control of your machine functionality and at the same time executing advanced data processing tasks. Combine it with ultra-reliable EtherCAT network for seamless connectivity of both Omron and third-party devices. By bringing together the worlds of real-time OS, EtherCAT connectivity and IT, you benefit from high-speed, high-precision and real-time machine control, and secure connectivity to the Internet of Things. You are in control: you are unstoppable.

Real-time control
- High-speed and low-jitter event-driven control
- Multitasking control to specify both conditions and orders for execution

High development efficiency
- Familiar C-language (C/C++) enables easy reuse of application assets
- Low switching cost
- Excellent integrated development environment, including debugging and monitoring functions to increase development efficiency
- More than 1,000 OSS applications already available in Linux platform

Execution performance
- Superior execution performance enables improved operational efficiency, even with limited hardware resources.

Industrial PC
- Hardware with proven reliability
- PLC-level environmental resistance
- Long-term supply stability
- Fully scalable

RTOS
VxWorks 7
- Real time
- High-speed operation and superior development efficiency
- Robust

Linux 7
- Extensive library of open source software (OSS)
- Readily available information via books and websites
- Robust

Industrial PC
IPC Programmable Multi Axis Controller

High-speed, high-precision motion controller plus PC - in one box
The IPC Programmable Multi-Axes Controller offers exceptionally precise motion control, with proven technology from Omron’s Delta Tau Data Systems, Inc. It was developed to help manufacturers boost both their productivity and their manufacturing quality, delivering world-beating1 output speeds allied to exceptional precision.

It comes equipped with Windows real-time operating systems which, combined with powerful control capability, provides exceptional flexibility. And it’s not just superior motion control: it also enables the creation of high-resolution graphics as well as customized applications for high-end production requirements. The system can perform predictable motion control while running intensive data-handling applications and, uniquely, will continue with motion control tasks even if the OS stops working.

Industrial PC
Operating System
- Windows (Embedded Standard 7)

Hypervisor
Enables the multiple operating system environment

Programmable Multi Axis Controller
Proven motion control technology from Delta Tau Data Systems, Inc.

Industrial PC Platform

High-speed multi-axis control
- Up to 128 axes of control
- Motion control period 250 μs/16 axes2

Flexibility
- Flexible function development capability (G-Code/ANSI C/original programming language)
- EtherCAT for flexible system configuration

Reliability
- Multi-tasking of Motion Control and Windows/applications
- Hypervisor3 software for uninterrupted control even if Windows is down
High-speed and high-precision motion controller and PC in one

The Omron IPC Programmable Multi Axis Controller can be integrated into your existing system, even if it uses products from other manufacturers. Consult your Omron representative.

System Configuration

*1. Refers to the motion control performance of 16.6 microseconds/1 axis or 50 microseconds/8 axes (Omron survey as of July 2016).
*2. Reference value.
*3. Software avoids mutual interference by appropriately assigning IPC hardware resources (boards, CPU cores, etc.) to OS. Machine control task is not interrupted even if a Windows crashes.

*2. Only for models with Intel® Xeon® Processor.
*3. Not recommended for new projects.
INDUSTRIAL PC PLATFORM

### IPC Machine Controller
- **NY51-1**
- **NY53-1/NY53-5**
- Two operating systems: Windows and Real-Time OS
- Windows Embedded Standard 7 - 32 bit
- Windows Embedded Standard 7 - 64 bit

### IPC Programmable Multi Axis Controller
- **NY51-1/NY53-5**
- Provides flexibility in the creation of high-resolution graphics and applications and the development of motion control for high-end applications
- Windows Embedded Standard 7 - 32 bit
- Windows Embedded Standard 7 - 64 bit

### Industrial Box PC
- **NY51-1/NY53-5**
- Machine Automation Control Software or Machine Automation Control Software + NC
- Intel® Core™ i7-4700EQ Processor 4th generation CPU with Fan Unit for active cooling
- 8 GB (non-ECC type)
- HDD, SSD, CFast, SD memory card
- Ethernet, EtherCAT, USB 2.0/3.0, DVI

### Industrial Panel PC
- **NY51-1/NY53-5**
- Programmable Multi Axis Controller
- 16, 32, 64
- Intel® Core™ i7-4700EQ Processor 4th generation CPU with Fan module for active cooling
- 8 GB (non-ECC type)
- SSD, SD memory card
- Ethernet, EtherCAT, USB 2.0/3.0, DVI
