NEW STANDARD

Expansion of various functions

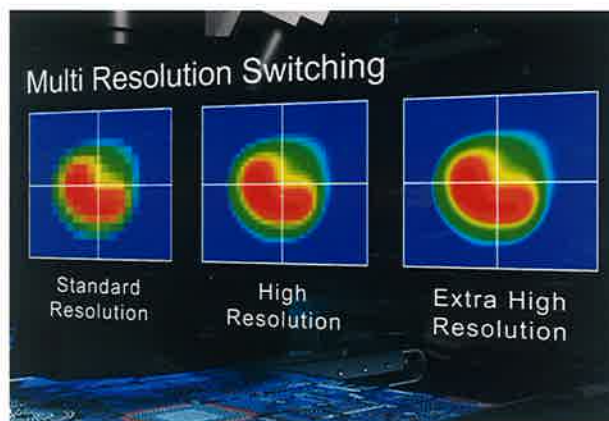

Future with Flexible Inspection

NEW FUNCTION

Multiple resolution switch function

Previous machine only had the option to switch between two separate modes. Now, you can switch between 3 different modes. The ability to correspond to a wider range of inspection targets such as ultra fine pads by switching the resolution.

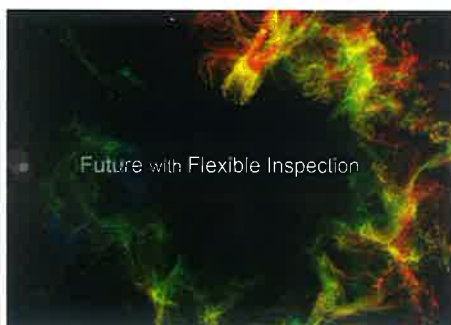

NEW DESIGN

User-friendly operation screen

GUI has been updated. Intuitive operation of the machine is achieved by creating graphical setting values and visualizing the production status.

Ergonomic main monitor

A better viewing experience is made possible by adopting a large monitor and angle adjustment mechanism.

NEW MOVIE

Promotional video

Uploaded an explainer video outlining the new functions associated with the VP9000, the multiple resolution switch function and improved exterior design. Please check the following link for more details
