FLEET SIMULATOR

Solve problems before they arise. Optimize your fleet before you deploy it.

The industry's first autonomous mobile robot fleet simulator for factory and manufacturing applications. Plan traffic and workflows for fleets of autonomous mobile robots to identify potential bottlenecks and optimize workflows without having to deploy a real robot.

SOME BENEFITS INCLUDE:

- Assess impact of map changes, scaling, route changes, and new software features
- Simulate up to 10 robots in up to three separate fleets
- Visualize individual robot path planning and interaction with other robots
- Simulate custom environment based on real-world facilities
- Identify traffic flow bottlenecks
- Validate third-party software
