Smart Sensors ZS Series
2D CMOS Laser Type

High-precision Displacement Measurement Sensors Bringing Smart Sensors into New Fields.
ZS-HL Series

Very High-performance Sensors that Support Core Quality from Very Long-range to Extremely Precise Measurements

- Range of models with measuring center distance of 20 to 1,500 mm.
- Achieves maximum resolution of 0.25 μm.
- Maximum response speed of 110 μs.
- Parallel output supported.

Highly Advanced Sensing Functionality

- Enables onsite high-speed logging of data in external memory (compact flash card) for the Sensor Controller or Multi-Controller.
- Effective for building traceability systems, statistical process control (SPC), and much more.
- Ideal for ZS Series Data Logging

Data Storage Unit ZS-DSU ZS-DSU

- High-speed sampling rate: 150 μs
- Powerful support for logging data using various trigger functions.

Multi-Controller ZS-MDC

- Enables full application of Sensor Controller information.
- Transfers data between multi-connected Sensor Controllers and performs high-speed multiprocessing.
- Connects to up to nine Sensor Controllers.

ZS-LD...
**Main Applications**

**High Performance** Very High-performance Sensors that Support Core Quality from Very Long-range to Extremely Precise Measurements

**ZS-HL Series**

- **ZS-LD10GT/LD15GT** Ideal for measuring and controlling dispenser nozzle gaps when applying sealer.

- **ZS-HLDS2T** Ideal for measuring the thickness of silicone or compound semiconductor wafers in polishing and testing processes. *Orders have been discontinued at the end of August 2019.*

- **ZS-HLDS2VT** Ideal for measuring the potting resin height for electronic components.

- **ZS-HLDS5T** Ideal for measuring liquid gasket (FPIG) application amounts. Prevents defects such as insufficient seal.

- **ZS-HLDS10** Ideal for confirming positioning and repeatability accuracy of XY stages.

- **ZS-HLDS60** Ideal for level detection for liquid crystal coaters and PDP fluorescent substances.

- **ZS-HLDS150** Protruding objects and steps can be measured from a distance for measurement objects that cannot be accessed easily.

**Standard** Ideal for a Variety of High-precision Displacement Measurements, Including Spot Detection, Wide-range Detection, and Long-distance Detection

**ZS-L Series**

- **ZS-LD20ST** Ideal for measurements requiring discrimination between minute parts or fine shape repeatability.

- **ZS-LD40T** Ideal for measuring glass thickness and nozzle gaps when coating glass with resist or sealer.

- **ZS-LD50/LD80** Ideal for measuring the warp of resin blades in copy machine toners.

- **ZS-LD200** Ideal for checking the precision of door installations.

- **ZS-LD350S** Ideal for checking the flatness of robot arms that transport wafers in load ports.
## Applications by Industry

### Automobile and Automotive Parts
- Measuring Car Bodies
- Measuring Door Attachment Offsets
- Measuring Tire Exteriors

### Electronic Components
- Inspecting Board Heights
- Inspecting for Board Coplanarity
- Measuring Shape for Positioning Laminated Ceramics

### Semiconductors
- Measuring Electrode Thickness on Compound Semiconductors
- Measuring Wafer Warping and Thickness
- Measuring Arm Inclination

### Household Appliances and Audio-visual
- Simultaneous Measuring of Touch Panel Film Thickness and Gap
- DVD Chassis Flatness Inspections
- Digital Camera Tube Lens Inspection

### LCDs and PDPs
- Measuring Glass Undulation
- Measuring Glass Surfaces
- Inspecting Glass Heights (Autofocus)

### Rubber, Resin, and Film
- Measuring Electrode Thickness on Dielectrics
- Moving Workpieces (Black Rubber)
- Measuring Depth of O-Ring Insertion
ZS-HL Series Product Lineup 2D CMOS High-end Displacement Sensors

Advanced sensing technology packed into the best Sensor Head for the highest sensing precision

Wide lineup of products from 0.25 μm high-resolution models to 1,500 mm long-range models.

All Models Are Class 2 Lasers.

2D CMOS Laser Image Sensing Element

The three basics of sensing - precision, speed, and sensitivity - can be balanced because ideal measurement settings can be made for light reception area.

Very high resolution

Extreme stability

High precision

High speed

Digital Sensing

Totally reliable measurements with completely digital sensing.

Extremely Sensitive Lenses

2D CMOS Laser Image Sensing Element

The three basics of sensing - precision, speed, and sensitivity - can be balanced because ideal measurement settings can be made for light reception area.

Deep Penetration Laser...

High resolution at 0.001 µm (ZS-LD10GT)

OMRON’s digital sensing technology achieves unbelievably high resolution.

±0.05% FS Linearity (ZS-HLDS2T)*

Unique OMRON algorithms reduce detection error to improve workpiece measurement accuracy.

Orders have been discontinued at the end of August 2019.

Super-high-speed Sampling at 110 µs (ZS-HLDS2T/LD150)

You get exact sensing with superior workpiece following performance. CMOS high-speed data reading accurately catches moving workpieces inline.

Extreme Stability

Ideal Size and Stability

Head Size

Complete sensing stability with optimum Sensor Head size for best performance and holding mechanism secured at 3 points. (See note.)

Extreme Sensitive Lenses

Superior Moving Resolution

Increased Lens Resolution

Moving resolution (error based on workpiece surface position) has been reduced dramatically by optimizing the optical system with increased sensitivity and resolution of the light receiving lenses.

Reduced Error for Different Materials

2D CMOS

With a CCD, the charge overflows to the next pixel when excessive light is received. This phenomenon does not occur with CMOS, so there are no effects from light fluctuations from different materials or excessive light reception.

High-performance Sensors

ZS-HLDS5T

ZS-HLDS2T

ZS-HLDS10

ZS-HLDS60/HLDS150

ZS-HLDS2T* ZS-HLDSST/HLDS10

Note: ZS-HLDS2T not applicable.

* Orders have been discontinued at the end of August 2019.
High-performance Sensors

**ZS-HLDS5T/HLDS10**
Detect Essentially Any Object

*Reduced Variation in Linearity between Different Objects, and Linearity Determines Measurement Accuracy. Makes it easier to introduce a variety of detection objects.*

### Linearity Characteristic

**Model** | Measuring center distance | Resolution | Linearity | Beam shape
--- | --- | --- | --- | ---
ZS-HLDS5T | 50±5 mm | 0.25 µm | ±0.1%F.S. | 30 µm × 1 mm
ZS-HLDS10 | 100±20 mm | 1 µm | ±0.1%F.S. | 60 µm × 3.5 mm

**Measuring Car Body Widths (ZS-HLDS10)**

Manage trends by measuring widths of each car model.

**ZS-HLDS60/HLDS150**
A Long Range That Handles Essentially Any Installation Site

*First 1,500 mm long range sensing in the industry enables measurement of previously impossible points.*

### Simple Long-distance Step Measurement

**Model** | Measuring center distance | Resolution | Linearity | Beam shape
--- | --- | --- | --- | ---
ZS-HLDS60 | 600±350 mm | 8 µm | ±0.07%F.S. | 0.3 mm × 16 mm
ZS-HLDS150 | 1500±500 mm | 500 µm | ±0.2%F.S. | 1.5 mm × 40 mm

**Peak/bottom measurement**

Note: This function may not be applicable in bright surrounds.
**ZS-HLDS2VT**

**Ideal for Measuring the Height and Thickness of Transparent Objects**

Tilted and moving workpieces can also be stably measured.

A special aspherical lens was developed for the ZS-HLDS2VT, and the design of the optical structure was optimized for regular-reflective workpieces. This has greatly increased the allowable degree of tilt and improved stability for measuring transparent and regular-reflective workpieces.

### Angle Characteristics

[Graph showing angle characteristics]
**ZS-HLDS2T*/ZS-LD10GT/LD15GT**

The Only Way to Very High-precision Measurements

Superior Features for Semiconductor Wafer, Glass, and Other Measurements Requiring Precision

---

**Ideal for Measuring Nozzle Gaps!**

- Reduced pattern influence for moving measurement, the best in the moving resolution industry.
- Possible to match nozzle drip point and measurement point then measure.
- Sensor Head with separate light emission and reception in one unit to create nozzle space.

---

**Simultaneous Measuring of Touch Panel Film Thickness and Gap**

An unbelievable stationary measurement precision of 0.25 µm, the highest in this product class.

---

**Height Control of Sealant Dispensers**

**Inspection of Disk Play on HDD Motor Rotating Plate**

---

**ZS-LD10GT/LD15GT**

Measures amplitude undulations of 5 µm.
 Technology

With OMRON’s sensing technology and newly developed algorithms, stable, high-precision measurement is possible of workpieces that were difficult to measure using laser displacement meters due to laser light penetration, transmission, excessive reflection, or insufficient light.

### Mechanisms for Stable Measurement

**Patent Pending**

**No more errors due to reflection coefficients between glass gaps**

Stable measurement by adding received light waveform in 2D image and digital zoom processing.

**Mechanisms for Stable Measurement**

**Patent Pending**

**No more errors due to workpiece reflection coefficients.**

Stable measurement using laser power algorithms that can be adjusted to any value.

Light quantity adjustment algorithms have evolved for stable measurement of a variety of measurement objects.

Even if the workpiece status changes suddenly, the sensitivity can compensate at any level so there is no measurement error from sensitivity switching.

**Mechanisms for High Resolution**

**Patent Pending**

**No more resolution errors.**

Digital processing technology between the Sensor and Controller provides high resolution.

High-speed digital communications (LVDS) used between Sensor and Controller. Image signal stabilizes because the clock error between the control signal from the Controller and the light reception device disappears. Optimum light quantity adjustment is possible with laser power algorithms that can be adjusted to any level, which facilitates super high resolution.

**Mechanisms for Stable Measurement**

**No more error due to penetration.**

Stable measurements are achieved by correctly recognizing the light reception distribution on the 2D CMOS.

Real surface displacement detected by eliminating penetration effects for PCBs, plastic, and other workpieces penetrated by laser light.

---

**Advanced technology is carried**
Sensor Controllers **ZS-HLDC** (Multitasking)

Enables maximum sensing performance with fully digital processing and multitasking functions.

A controller the size of a business card filled with OMRON’s leading-edge digital technology. Enables easy utilization of the ultimate in measurement performance.

### Outline of Functions

**ZS-HLDC**

- **Multitask Mode**
  - Sensing
  - Task 1
  - Task 2
  - Task 3
  - Task 4
  - Filter
  - Output

**ZS-LDC**

- **Top Operation Menu**
  - Sensing
  - Task 1
  - Task 2
  - Task 3
  - Task 4
  - Filter
  - Output

### High-performance Sensing (Multitasking)

#### Simultaneous Measurement and Output of Up to 4 Features

- For detection of small recesses and protrusions in measurement location
- For measurement of steps in different locations with moving Sensor or workpiece

**Setting example**

- **Task 1:** Step

**Setting example**

- **Task 1:** Average
- **Task 2:** Average

**Setting example**

- **Task 1:** Average, Average hold
- **Task 2:** Average, Point-to-point hold

### Simultaneous Control in 2 Systems of Data Confirmation and Analysis and Data Collection, Control, and Changeovers

**Control Using CompoWay/F**

- Data Confirmation and Analysis
  - Checks sensing screen.
  - Checks measurement values.
  - Logs measurement values.

**Control Using No-protocol Communications**

- Data collection, control, and changeovers
  - Gets measurement results.
  - Resets to zero.
  - Switches banks.

### Improved Total Cycle Time with 1-second High-speed Bank Switching
Easy Sensing with an HMI That Couldn’t Be Easier to Use  (Common Functions)

Information at the Touch of a Button
In RUN (measurement) Mode, measured values and information are displayed using 2 rows of 8-segment LEDs. The large LED display improves visibility. Measurement information includes the threshold, current, resolution, and received light amount and is available with simple key operations. LCD screens can be customized to change the display of desired information to easier-to-understand terminology.

Set Sensing Directly
In FUN (setting) Mode, setting menus are displayed on the 2 rows of the LCD. Easy-to-understand guidance simplifies setting the many display capabilities of the LCD. Function keys correspond to displayed menu items for intuitive setting of measurement conditions and other parameters. You can also easily switch between Japanese and English displays. Communication with the operator is better than ever before.

Connect directly to a PC using USB.
USB 2.0 and RS-232C provided as standard features. LVDS, a new-generation digital high-speed communications interface, is used between the Sensor Head and Controller, an industry first. If USB is used to connect to the computer, high-speed all-digital measurement data transfer is possible. Firmware can be updated easily using the SmartMonitor WarpEngine.

Mount to DIN Track or directly to control panels.

ZS-LDC
Single Task Controller
Simple Operation
Reasonable Price
ZS-L Series Product Lineup 2D CMOS Low-end Displacement Sensors

Advanced sensing technology packed into the smallest Sensor Heads in this class.

- Smallest size in this class (65 × 65 mm)
- Uniform Sensor Head size
- Line/spot beam type
- Detects black rubber, mirror, and transparent workpieces

ZS-LD50/LD80/LD130/LD200/LD350S

- 2D CMOS image sensor
- Super Sensitive Lens
- Laser Class 2
- Degree of Protection: IP67 (Models with 2 m cable)
- Measurement range: 10 mm
- Measurement range: 30 mm
- Measurement range: 100 mm
- Measurement range: 270 mm

ZS-LD20T/LD40T

- 2D CMOS image sensing element
- Laser Class 2
- Degree of Protection: IP67 (Models with 2 m cable)
- Line beam (2000 × 35 μm)
- Resolution: 0.25 μm
- Line beam (900 × 25 μm)
- Measurement range: 2 mm
- Measurement range: 5 mm

ZS-LD20ST/LD50S

- Spot Beam Sensors
- Diffuse Reflection Sensors
- Regular Reflection Sensors

Note: Sensor Head can be installed to for either diffuse reflection or regular reflection. (except ZS-LD350S) Correctly compensates measurement values to suit different applications.
Stable Measurements for PCBs, Black Resin, and Metal
- All you need to do is select the proper mode to achieve stable sensing of PCBs, resins, black rubber, and other light-penetrating workpieces (these could not be easily handled with previous reflective laser displacement meters.)

**ZS-LD80**
Measuring the Shape of Black Resin Workpieces

Complete measurement data will be obtained at angles of up to 40°.

**ZS-LD50**
Measuring the Shape PCB Surfaces

PCB shapes can be measured without burs or waveform disruptions.

**Stable Measurements for Glass**
- Stably measure height and undulations in transparent, coated, or colored glass on work tables.
- Stable detection at 40 mm with a line beam of 2 mm.
- A 2-mm line beam reduces the influence of black and white patterns on granite work tables to achieve stable measurements.

**ZS-LD40T**
Measuring Glass Surfaces

Ideal for measuring glass thickness and slit nozzle gaps when coating glass with resist or sealer.

---

**Line Beam Sensors for Emphasis on Stable Measurement**
Line beams produce an averaging effect that is less likely to be affected by surface irregularities, creating stable measurements. Ideal for stable measurements that do not rely on the surface of the target workpiece.

**Spot Beam Sensors Ideal for Minute Workpieces and Shape Measurement**
Ideal for measurements requiring minute shape repeatability while matching laser beam position with a minute target measurement area.

**Easy Sensing with an HMI That Couldn't Be Easier to Use**
- Just select High-precision Mode to stably measure black rubber.
- Just select Penetration Mode to stably measure PCBs or black resin.

**Set Sensing Directly**
*FUN (setting mode)*
Direct setting with function keys.

---

**Standard Sensors**

Multi-Controller ZS-MDC
Centralized Controller Information Calculations

Transfers data between multi-connected Controllers and performs high-speed multiprocessing.

**High-speed Connections for Up To 9 Controllers**
See the difference in applications requiring multipoint measurement, such as thickness, steps, and flatness measurements. Connect up to 9 Controllers with the fastest high-speed bus in the industry. Digital processing prevents data dropouts to provide the capability to measure exactly what is seen. Sampling speed with 3 Controllers connected: 110 μs, Sampling speed with 9 Controllers connected: 380 μs
Note: When using communications commands.

**Processing Enabled by the Multi-Controller**

### Flatness Calculations
Calculating the difference between the maximum and minimum values.

- **Calculation:** Task 1 = Max. (A, B, ⋯) - Min. (A, B, ⋯)
- **Number of Sensor Controllers:** 3 to 9

### Multipoint Thickness Calculations
Calculating the difference between pairs of points.

- **Calculation:** Task 1 = (A + C) / 2
- **Number of Sensor Controllers:** 3

### Average Height Calculations
Calculating the average surface height.

- **Calculation:** Task 1 = Average (A, B, C, ⋯)
- **Number of Sensor Controllers:** 2 to 9

### Reference Step Calculations
Calculating the difference between a reference point (A) and other points.

- **Calculation:** Task 1 = A - B
- **Number of Sensor Controllers:** 3

### Relative Step Calculations
Calculating the difference between all points.

- **Calculation:** Task 1 = A - B
- **Number of Sensor Controllers:** 3 to 9

### Warp Calculations
Calculating warping of selected sides

- **Calculation:** Task 1 = B - (A + C)/2
- **Number of Sensor Controllers:** 3

### Twisting Calculations
Calculating twisting between opposing sides.

- **Calculation:** Task 1 = (A - B) - (D - C)
- **Number of Sensor Controllers:** 4

### User-set Calculations
Formulas can be flexibly set.

- **Calculation:** Task 1 = K - (A + B)
- **Number of Sensor Controllers:** 3 to 9

- **Calculation:** Task 1 = K - (C + D)
- **Number of Sensor Controllers:** 3 to 9

- **Calculation:** Task 1 = K - (E + F)
- **Number of Sensor Controllers:** 3 to 9

- **Formulas can be flexibly set:** [K + mX + nY]

- **Number of Sensor Controllers:** 3 to 9

### Multi-calculations of Data
Multipoint measurement
High-speed data transfer
Data Storage Unit **ZS-DSU**

**Logging Software for Onsite Installed**

Efficiently stores sensing data using a variety of logging functions. High-speed, long term logging settings can be used to precisely process the required sensing data, which can be reliably and completely collected using USB and an all-digital bus. Sensor setting data can also be stored. Data for up to 128 banks can be stored and transferred to the Master Unit for changeovers.

- **High-speed sampling rate:** 150 μs max.
- **Powerful support for logging data using various trigger functions.**

Setting Software for ZS Series SmartMonitor V3 Professional ZS-SW11V3E

Use a Computer for Everything from Ideal ZS Settings to Powerful Support of Data Collection and Analysis.

Easy Settings Using USB.

More Powerful Setting Support

The CMOS light reception image and the received light waveform can be displayed. The real power of the SmartMonitor is seen when measuring transparent objects and other workpieces that create multiple received light waveforms.

High-speed simultaneous multichannel waveform graphs.

High-speed display: 2-ms interval at max. speed (see note);
Simultaneous multichannel waveform display: Up to 9 waveforms can be displayed.

Note: Data may be skipped, depending on the computer system. Use a computer that meets the recommended system requirements.

Log measurement results at various times to leave judgment and inspection results. The fastest sampling interval is 500 μs (see note).

Note: Data may be skipped, depending on the computer system. Use a computer that meets the recommended system requirements.

Excel macro provided for simple analysis.

Data collected by logging can be processed with an Excel macro using filters, slope compensation, filter median transitions, differentiation, integration, and arithmetic functions and then used for nominal judgments and other determinations.

Recommended System Requirements

SmartMonitor Professional
OS: Windows 10 (32-bit/64-bit version)
    Windows 7 (32-bit/64-bit version)
Windows XP (Service Pack3 or higher, 32-bit version)
CPU: Intel Pentium III 1 GHz or faster (2 GHz min. recommended.)
Memory: 1 GB min.
Available hard disk space: 50 MB min.
Display screen: 1,024 × 768 dots min., 16 million colors min.
Note: If the recommended system requirements are not met, data may be interrupted and waveforms not displayed correctly when using the logging, high-speed graph drawing, and multi-channel waveform drawing functions.

SmartAnalyzer Macro Edition

For Microsoft Excel Macro Programming
Microsoft Excel 2000 or later required.

1. Defined as 1/e2 (13.5%) of the center optical intensity at the actual measuring center distance (effective value). The beam diameter is sometimes influenced by the ambient conditions of the workpiece, such as leaked light from the main beam.
2. This is the error in the measured value with respect to an ideal straight line. Linearity may change according to the workpiece.
3. This is the peak-to-peak displacement conversion value in the displacement output at the measuring center distance in high-precision mode when the number of samples to average is set to within the graph.
4. This is the value obtained at the measuring center distance when the Sensor and workpiece are fixed by an aluminum jig. (typical example)
5. Protection structure of connector area is IP40.
6. Ask your OMRON representative about Sensor Heads with IP67 protection.

*1. Defined as 1/e² (13.5%) of the center optical intensity at the actual measuring center distance (effective value). The beam diameter is sometimes influenced by the ambient conditions of the workpiece, such as leaked light from the main beam.
*2. This is the error in the measured value with respect to an ideal straight line. The standard workpiece is white aluminum ceramics and glass in the ZS-LD50/LD50S regular reflection mode. Linearity may change according to the workpiece.
*3. This is the peak-to-peak displacement conversion value in the displacement output at the measuring center distance in high-precision mode when the number of samples to average is set to 128 and the measuring mode is set to the high-resolution mode. The standard workpiece is white aluminum ceramics and glass in the ZS-LD50/LD50S regular reflection mode.
*4. This is the value obtained at the measuring center distance when the Sensor and workpiece are fixed by an aluminum Jig.
*5. Protection structure of connector area is IP40.
## Ratings and Specifications

**ZS-MDC**:
- Multi-Controllers
- Basic specifications are the same as those for the ZS-LDC:
  - 1. Sensor Heads cannot be connected.
  - 2. Control Link Units are required to connect up to 9 Controllers.
  - 3. Processing functions between Controllers: Arithmetic functions

**ZS-DSU**:
- Data Storage Unit

Sensor Heads
ZS-LD10GT

- Measuring center: 30 ± 0.1 mm
- Emission axis: 30 ± 0.1 mm
- Reception axis: 20 ± 0.1 mm
- Dimensions: 96 ± 0.1 mm
- Connectors: 8.5 mm dia.
- Mounting holes: 4.5 mm dia., depth: 4 mm
- Vinyl insulated round cable: 6.2 mm dia.
- Standard length: 0.5 m and 2 m

Sensor Heads
ZS-LD15GT

- Measuring center: 30 ± 0.1 mm
- Emission axis: 8 ± 0.1 mm
- Reception axis: 20 ± 0.1 mm
- Dimensions: 96 ± 0.1 mm
- Connectors: 11.5 mm dia.
- Mounting holes: 4.5 mm dia., depth: 4 mm
- Vinyl insulated round cable: 6.2 mm dia.
- Standard length: 0.5 m and 2 m

Sensor Heads
ZS-LD50/LD50S/LD80/LD130/LD200/LD350S

- Measuring center: 45 mm
- Emission axis: 27.1 mm
- Reception axis: 4.5 mm dia.
- Dimensions: 36 ± 0.3 mm
- Connectors: 15 mm
- Mounting holes: 4.5 mm dia., depth: 4 mm
- Vinyl insulated round cable: 6.2 mm dia.
- Standard length: 0.5 m and 2 m

Sensor Heads
ZS-HLDS2VT/LD20T/LD20ST/LD40T

- Measuring center: 15.30 mm
- Emission axis: 30 ± 0.1 mm
- Reception axis: 8 ± 0.1 mm
- Dimensions: 55 ± 0.3 mm
- Connectors: 6.5 mm
- Mounting holes: 4.5 mm dia., depth: 4 mm
- Vinyl insulated round cable: 6.2 mm dia.
- Standard length: 0.5 m and 2 m

Note: L = 50 and A = 30° for the ZS-LD50/LD50S.
L = 80 and A = 15° for the ZS-LD80.
L = 130 and A = 12° for the ZS-LD130.
L = 200 and A = 8° for the ZS-LD200.
L = 350 and A = 5° for the ZS-LD350S.

Note: L = 25 and A = 34.5° for the ZS-HLDS2VT.
L = 50 and A = 45° for the ZS-LD20T/LD20ST.
L = 40 and A = 32° for the ZS-LD40T.

READ AND UNDERSTAND THIS DOCUMENT
Please read and understand this document before using the products. Please consult your OMRON representative if you have any questions or comments.

WARRANTY
OMRON’s exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY
OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON’s ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

SUITABILITY FOR USE
THE PRODUCTS CONTAINED IN THIS DOCUMENT ARE NOT SAFETY RATED. THEY ARE NOT DESIGNED OR RATED FOR ENSURING SAFETY OF PERSONS, AND SHOULD NOT BE RELIED UPON AS A SAFETY COMPONENT OR PROTECTIVE DEVICE FOR SUCH PURPOSES. Please refer to separate catalogs for OMRON’s safety rated products.

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer’s application or use of the product.

At the customer’s request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PERFORMANCE DATA
Performance data given in this document is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON’s test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

CHANGE IN SPECIFICATIONS
Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS
Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ERRORS AND OMISSIONS
The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

PROGRAMMABLE PRODUCTS
OMRON shall not be responsible for the user’s programming of a programmable product, or any consequence thereof.

COPYRIGHT AND COPY PERMISSION
This document shall not be copied for sales or promotions without permission.

This document is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this document in any manner, for any other purpose. If copying or transmitting this document to another, please copy or transmit it in its entirety.

Safety Precautions for Using Laser Equipment

WARNING
Do not expose your eyes to the laser radiation either directly or indirectly (i.e., after reflection from a mirror or shiny surface). The laser radiation has a high power density and exposure may result in loss of sight.

Laser Label Indications
Attach the following warning label to the side of the ZS series Sensor Head.

WARNING

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.
This document provides information mainly for selecting suitable models. Please read the manual carefully for information that the user must understand and accept before purchase, including information on warranty, limitations of liability, and precautions.
