

## Photoelectric Sensor with Built-in Amplifier for Detecting Transparent PET Bottles

# E3Z-B

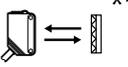

- Uses OMRON's unique optical system ("Inner View") that can detect various shapes of PET bottles and transparent objects.
- Detects a wide range of bottles from 500-ml bottles to 2-l bottles, and from single bottles to sets of stocked bottles.
- Provides a high degree of protection (IP67), mutual interference protection function, and CE Marking as standard features (for all Sensors in E3Z Series).
