Introduction

The HS-360X Four-Slot Spare Battery Charger, P/N 98-9000185-01, charges up to four single spare batteries. The charger can sit on a desktop or mount on a wall. This document provides basic instructions for charger set up and use.

For best performance, fully charge the device battery before using the device for the first time.

To charge the device battery, insert the battery in the charger. The battery begins charging when the LED indicator on the battery charger LED is amber (blinking or stays on). A complete charge of a fully discharged battery can take up to five hours. Charge within the recommended temperature of 32° to 104° F (0° to 40° C) nominal, 41° to 95° F (5° to 35° C) ideal.

Accessories

- Two screws (for wall mounting, if applicable; user-supplied).
- Power supply for desk/wall mounting configuration.

Four Slot Spare Battery Charger Back View

NOTE

The USB port connection is only required to update firmware. It is not required for normal operation.
Mounting the Charger
To mount the charger on a vertical (wall) surface:
1. Connect the power cable to the power port and an AC power source. Insert the power cable into the cable groove.
2. At the desired location, mark the location of the screws holes. The distance between the two mounting screw holes is 103 mm. The gap between the wall and the screw head is approximately 2.5 mm.
3. Pre-drill holes to accommodate two screws.
4. Attach the charger securely to the surface.
5. Insert up to four batteries to charge.

Inserting Batteries
To insert batteries in the battery charger, angle the battery with the contacts facing up and slide the contact side of the battery under the LED indicator ledge as shown below. Push down on the label surface of the battery until it clicks in place, engaging the contacts in the battery charger.

Removing Batteries
To remove batteries from the charger, pull the battery out of the battery well from the top of the battery.

Charging Batteries
To insert batteries in the battery charger, angle the battery with the contacts facing up and slide the contact side of the battery under the LED indicator ledge as shown below. Push down on the label surface of the battery until it clicks in place, engaging the contacts in the battery charger.

### Troubleshooting

If the charger does not work after following the previous procedures:
- Check the system power.
- Check for loose cable connections.
- Check that batteries are inserted properly in the charger.

⚠️ **CAUTION** Do not pour, spray, or spill any liquid on the charger.

### Maintenance

- Protect the charger from temperature extremes.
- Do not store or use the charger in any location that is extremely dusty, damp, or wet.
- Use a soft cloth to clean the charger. If the surface of the charger becomes soiled, clean it with a soft cloth moistened with a diluted window-cleaning solution.
Regulatory Information

This device is approved under Zebra Technologies Corporation. This guide applies to Model Number: SAC3600. All Zebra devices are designed to be compliant with rules and regulations in locations they are sold and will be labeled as required. Local language translations can be requested at: http://www.zebra.com/support. Any changes or modifications to Zebra equipment, not expressly approved by Zebra, could void the user’s authority to operate the equipment. For use only with Omron Microscan-approved and UL-listed/recognized battery packs.

**CAUTION** Only use Omron Microscan-approved and UL-listed accessories, battery packs, and battery chargers.

Do NOT attempt to charge damp/wet batteries.

All components must be dry before connecting to an external power source.

Declared maximum operating temperature: 50°C.

Power Supply

Use only an Omron Microscan-approved UL-LISTED ITE (IEC/EN 60950-1) power supply with electrical ratings: Output 12 Vdc, min 4.6A, with a maximum ambient temperature of at least 50 degrees C. Use of alternative power supply will invalidate any approvals given to this device and may be dangerous.

Batteries

**Taiwan - Recycling**

EPA (Environmental Protection Administration) requires dry battery producing or importing firms in accordance with Article 15 of the Waste Disposal Act are required to indicate the recycling marks on the batteries used in sales, giveaway, or promotion. Contact a qualified Taiwanese recycler for proper battery disposal.

Battery Information

**CAUTION** Risk of explosion if battery is replaced by an incorrect type.

Dispose of batteries according to instructions.

Use only Omron Microscan-approved batteries. Accessories which have battery charging capability are approved for use with the following battery models: Part Number: 12-9005539-01 (3.6 Vdc, TYP. 3193 mAh, MIN. 3100 mAh).

Omron Microscan-approved rechargeable battery packs are designed and constructed to the highest standards within the industry. However, there are limitations as to how long a battery can operate or be stored before needing replacement. Many factors affect the actual life cycle of a battery pack such as heat, cold, harsh environmental conditions, and severe drops.
When batteries are stored over six months, some irreversible deterioration in overall battery quality may occur. Store batteries at half of full charge in a dry, cool place, removed from the equipment to prevent loss of capacity, rusting of metallic parts, and electrolyte leakage. When storing batteries for one year or longer, the charge level should be verified at least once a year and charged to half of full charge.

Replace the battery when a significant loss of run time is detected.

Standard warranty period for all Omron Microscan batteries is 30 days, regardless if the battery was purchased separately or included as part of the barcode scanner.

Battery Safety Guidelines

The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non-commercial environment.

- Follow battery usage, storage, and charging guidelines found in the user’s guide.
- Improper battery use may result in a fire, explosion, or other hazard.
- To charge the mobile device battery, the battery and charger temperatures must be between +32 °F and +104 °F (0 °C and +40 °C).
- Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a battery or a charger, contact Omron Microscan support.
- Do not disassemble or open, crush, bend or deform, puncture, or shred.
- Severe impact from dropping any battery-operated device on a hard surface could cause the battery to overheat.
- Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.
- Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place battery into a microwave oven or dryer.
- Battery usage by children should be supervised.
- Please follow local regulations to promptly dispose of used rechargeable batteries.
- Do not dispose of batteries in fire.
- Seek medical advice immediately if a battery has been swallowed.
- In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.
- If you suspect damage to your equipment or battery, contact Omron Microscan support to arrange for inspection.

Radio Frequency Interference Requirements - FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this
equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

Radio Frequency Interference Requirements - Canada

## Multi-Language Recycling Instructions

**Nederlands:** Voor klanten in de EU: alle producten dienen aan het einde van hun levensduur naar Omron Microscan te worden teruggezonden voor recycling. Raadpleeg: http://www.microscan.com/support voor meer informatie over het terugzenden van producten.

**Polski:** Klientom z obszaru Unii Europejskiej: Produkty wycofane z eksploatacji należą do firmy Omron Microscan w celu ich utylizacji. Informacje na temat zwrotu produktów znajdziecie na stronie internetowej: http://www.microscan.com/support.

**Português:** Para clientes da UE: todos os produtos no fim da vida devem ser devolvidos à Omron Microscan para reciclagem. Para obter informações sobre como devolver o produto, visite: http://www.microscan.com/support.

**Românesc:** Pentru clienții din UE: toate produsele, la sfârșitul duratei lor de funcționare, trebuie returnate la Omron Microscan pentru reciclare. Pentru informații despre returnarea produsului, accesați: http://www.microscan.com/support.

**Slovenčina:** Pre zákazníkov zo zemí EU: všetky výrobky musia byť po uplynutí doby ich životnosti vrátené spoločnosti Omron Microscan na recykláciu. Bližšie informácie o vrátiť výrobku najdete na: http://www.microscan.com/support.

**Svenska:** För kunder inom EU: Alla produkter som uppnår sin livslängd måste returneras till Omron Microscan för återvinning. Information om hur du returnerar produkten finns på: http://www.microscan.com/support.

**Türkçe:** AB Müşterileri için: Kullanım süresi dolan tüm ürünleri Omron Microscan için geri dönüştürme için iade edilmelidir. Ürünlerin nasıl iade edileceğini öğrenmek için lütfen şu adresi ziyaret edin: http://www.microscan.com/support.
